SUMMARY

Highly motivated third-year Bachelor of Science in Computer Science student at the Technical University of Mombasa (Expected Graduation: May 2027) with a strong foundation in systems administration, networking, and software development. Experienced in Linux and Windows server environments, database management, and development of secure, data-driven applications. Seeking an ICT attachment opportunity at the Kenya Revenue Authority to apply technical skills in IT infrastructure support, system maintenance, and software solutions development.

ACADEMIC & PERSONAL PROJECTS

Network Infrastructure Simulation

- Designed and configured a Local Area Network using Cisco Packet Tracer, including routers, switches, IP addressing, and subnetting.
- Documented network topology and configuration process.

Linux Server Administration Project

Configured a Linux server environment, including:

- User and group management
- File permissions and access control
- Shared directories
- System updates and monitoring
